

Stakeholder Map & Strategy

Influence x Interest matrix

Quadrant labels and stance are not interchangeable. Every row is unconfirmed.

- Champion
- Blocker
- Supporter
- Bystander

Stakeholder candidate	Influence	Interest	Quadrant	Stance	Evidence / reason
Proposed sponsor / decision maker	NEEDS TEAM INPUT	NEEDS TEAM INPUT	NEEDS TEAM INPUT	NEEDS TEAM INPUT	Exact identity and relationship are not recorded.
Proposed intended-user representative	NEEDS TEAM INPUT	NEEDS TEAM INPUT	NEEDS TEAM INPUT	NEEDS TEAM INPUT	Use case and user evidence are not recorded.
Proposed data owner / provider	NEEDS TEAM INPUT	NEEDS TEAM INPUT	NEEDS TEAM INPUT	NEEDS TEAM INPUT	Dataset ownership and access evidence are not recorded.
Proposed engineering / integration owner	NEEDS TEAM INPUT	NEEDS TEAM INPUT	NEEDS TEAM INPUT	NEEDS TEAM INPUT	Integration context is not recorded.
Proposed AI quality reviewer	NEEDS TEAM INPUT	NEEDS TEAM INPUT	NEEDS TEAM INPUT	NEEDS TEAM INPUT	Evaluation owner and evidence are not recorded.
Proposed privacy / security reviewer	NEEDS TEAM INPUT	NEEDS TEAM INPUT	NEEDS TEAM INPUT	NEEDS TEAM INPUT	Risk owner and review evidence are not recorded.

Leverage: 2 strong-support candidates

Champion candidate: NEEDS TEAM INPUT - identify the strong supporter.
Supporter candidate: NEEDS TEAM INPUT - identify the practical enabler.

Persuade / risk-reduce: 2 candidates

Persuasion candidate: NEEDS TEAM INPUT - identify the highest-risk voice.
Risk-reduction candidate: NEEDS TEAM INPUT - identify the approver.

Concrete actions for the next 1-2 weeks

- 1 Confirm the six stakeholder identities and evidence source.
- 2 Classify influence, interest, quadrant, and stance separately.
- 3 Send the internal prototype/demo to the selected user representative for feedback.
- 4 Record one concrete response or decision before the next checkpoint.

Pitch & RACI

CONCLUSION

NEEDS TEAM INPUT - confirm the DataUnifi goal before approving a rollout recommendation.

Audience: Priority stakeholder: **NEEDS TEAM INPUT**

2-3 REASONS

- No confirmed use case or 1-3 month outcome is recorded.
- No validated user or stakeholder evidence is recorded.
- A limited evidence-gathering checkpoint reduces decision risk while facts are confirmed.

EVIDENCE

Repository evidence: project/team identity only. Any current artefact must be described as an internal prototype/demo until the team supplies validation evidence.

SMALL ASK

Small ask: confirm the target use case, decision audience, and acceptance criteria for one limited checkpoint.

OBJECTION + RESPONSE

"Chất lượng AI chưa đủ ổn định để triển khai."

Proposed response: use a limited internal prototype/pilot with a named acceptance set, review results, and expand only if the agreed criteria are met.

Risk-reduction logic

Proposed limited checkpoint: named acceptance criteria, documented result, then a deliberate go / revise decision.

PROPOSED RACI - exactly one A per task; team confirmation required

Task	Huy	Trang	Dung	Stakeholder
Confirm use case and success criteria	A	C	R	NEEDS TEAM INPUT
Prepare source data and schema	R	I	A	NEEDS TEAM INPUT
Build AI and data pipeline prototype	R	C	A	NEEDS TEAM INPUT
Define test set and evaluation plan	A	C	R	NEEDS TEAM INPUT
Review demo or limited pilot readiness	A	R	C	NEEDS TEAM INPUT

R = Responsible | A = Accountable | C = Consulted | I = Informed

AI Team Design

ARCHITECTURE

PROPOSED - HYBRID / NEEDS TEAM INPUT

The known team has three members. A hybrid shape can keep ownership close to the project while adding targeted review or domain help; project stage and resource limits still need confirmation.

CORE ROLES - needed now

- AI / Product - define outcome and user value
- AI Engineering - prototype model and workflow
- Data / Backend - prepare data and integration
- Eval / MLOps - define checks and release evidence

EXTENDED ROLES - only when scale requires

- UX - only when user workflow is confirmed
- Domain - partner before a domain-sensitive pilot
- Governance - add for privacy, risk, or scale review

CAPABILITY GAPS + PRIORITY RESOURCING

Capability gap	Hire / Outsource / Partner	Why	When needed
Confirmed use case and domain context	Partner	External context is safer to validate than to assume.	Before a pilot or stakeholder decision.
Evaluation baseline and acceptance criteria	Build internally	The team needs a repeatable test set for each release.	Before any rollout recommendation.

Team/Squad của chúng tôi sở hữu NEEDS TEAM INPUT - the confirmed DataUnifi use case và chịu trách nhiệm đưa NEEDS TEAM INPUT - prototype outcome từ hiện trạng NEEDS TEAM INPUT đến NEEDS TEAM INPUT - agreed pilot readiness.

The sentence is a proposal until the team confirms the use case and target state.

Team Health & Growth Plan

Dimension	Huy	Trang	Dũng	Team Summary
AI Quality	NEEDS TEAM INPUT	NEEDS TEAM INPUT	NEEDS TEAM INPUT	NEEDS TEAM INPUT
Progress	NEEDS TEAM INPUT	NEEDS TEAM INPUT	NEEDS TEAM INPUT	NEEDS TEAM INPUT
Team Morale	NEEDS TEAM INPUT	NEEDS TEAM INPUT	NEEDS TEAM INPUT	NEEDS TEAM INPUT
Shipping Speed	NEEDS TEAM INPUT	NEEDS TEAM INPUT	NEEDS TEAM INPUT	NEEDS TEAM INPUT

PRIORITY ISSUE

NEEDS TEAM INPUT - confirm the lowest dimension, largest disagreement, reason, and milestone impact.

COMPETENCY

Role: NEEDS TEAM INPUT | Current/nearest level: NEEDS TEAM INPUT | Next competency: evaluation/evals is a proposal pending role confirmation.

GROWTH PLAN - 30 DAYS / PROPOSED

Problem	30-day action	Owner	Deadline	Completion signal
No agreed evaluation baseline	Confirm a golden test set and run it before each release	NEEDS TEAM INPUT	30 days after confirmation	Saved eval result linked to a release
Current goal is not shared	Write one measurable 1-3 month goal and acceptance signal	NEEDS TEAM INPUT	Within 7 days of confirmation	Goal appears in JOB.md and README
Stakeholder feedback path is unknown	Run one documented feedback checkpoint with the selected representative	NEEDS TEAM INPUT	Within 30 days of confirmation	Feedback note and decision are recorded

TEAM CONFIRMATION REQUIRED

- 1. DataUnifi current goal: NEEDS TEAM INPUT
- 2. Proposed RACI: confirm or edit the proposed matrix.
- 3. Team Health: Huy: NEEDS TEAM INPUT | Trang: NEEDS TEAM INPUT | Dũng: NEEDS TEAM INPUT
- 4. Competency / Growth commitments: NEEDS TEAM INPUT

Reply: YES or edit the lines that need to change.
